Solutions for the connected enterprise

Maarga = Enterprise Communication & Collaboration

Start up customer

CLIENT

A start-up client that specializes in products for recordless communication.

BUSINESS CHALLENGE

Being a start-up organization they wanted to increase their market presence and evolve into a major player by intensifying their operations. They were pioneers in recordless email product. They wanted the same capability for their Lotus Domino plug-ins which should follow best practices in product development.

REQUIREMENTS

The organization required the product for Lotus Domino to be built based on their specifications which could potentially be deployed in very large firms. Some key features included:

- Enable a web services model for an easier access of data
- Ensure that no email gets stored
- Installation and Configuration

MAARGA'S SOLUTION

Maarga provided the design and development capability to build the V1 of the product that was based on best practices and principles.

TECHNOLOGY USED

- Domino (6.x, 7.x, 8.x)
- Web Services
- AJAX
- Java
